OIL	Rotella 15-40	14	15.75	220.50T
PMISC	Coolant level, Cam sensor, Speed sensor		272.24	272.24T
PMISC	Oil seal kit		87.24	87.24T
LABOR	Customer complained truck was smoking/running poorly. Hooked up with insite and ran a cylinder cutout test, everything checked out ok. Only code logged was coolant level. Had to replace coolant level sensor in order to run tests with insite to check turbo and egr which checked ok. Removed air filters and cleaned. Checked for CAC leaks. Swapped cam sensor with another truck at the shop, sensor broke while removing and had to be replaced. Found that the tone ring that the vehicle speed sensor runs on was slipping. Removed driveline and speed sensor housing to replace sensor. Truck still ran poorly. Removed valve cover and found several lobes on the valve cam that were ground off. Removed and replaced cam and rocker levers with an updated rocker lever that is supposed to help cams last longer. Changed oil and oil filter. Advised customer to change oil at 5,000 miles. Also advised that hood bushings are bad and coolant leak needs to be fixed after parts are ordered.	33	70.00	2,310.00T
